

# Removing Mouth Noises During the Editing Process

This Resource Package includes 2 audio examples for you to practice removing mouth sounds from Voice-Over Recordings. Both Example 1 and Example 2 in the included "Audio" Folder contain a "Before" and "After" version.

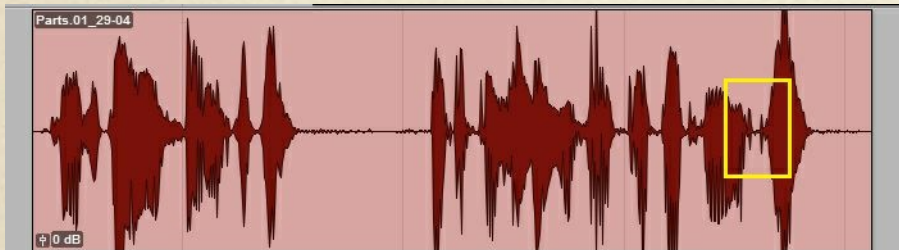

The "Before" Versions include Mouth Noises, and the "After" Versions are the edited files after the mouth noise has been removed using the methods described in the video on the Blog.

## INSTRUCTIONS:

Using the methods described in the video on the blog, identify and remove the mouth noises from the "Before" clips. Compare your work to the "After" clips to see if you have removed the mouth noises successfully. If you are having trouble locating the Mouth Noises in the Waveform, there are some quick "Cheat Sheet" images below, highlighting the portion of the waveforms containing the Noises.

## CHEAT SHEET:

### Example 1

### Example 2
